## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-34 and 40-44 drawn to a paddle diverter system, classified in class 198, subclass 370.08.
- II. Claims 35-39, drawn to a belted driving assembly classified in class 198, subclass 804.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as diverting articles off of a conveyor path, whereas Group II only requires a conveyor belted drive assembly alone. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If applicant should elect Group I, then the following election as species is applicable. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, Figures 1-7B, 11-11C, 17, 27 drawn to a first embodiment of a paddle diverter system, first merge system and a first embodiment of a justifier assembly

Species II, Figures 8, 9, 11D, 11E, 12, 18, 28 drawn to a second embodiment of a paddle diverter assembly having a positive bi-directional sorter, a second embodiment of an arm of the paddle diverter assembly, a second embodiment of the arm cover, a second merge system and a second embodiment of a justifier assembly

Species III, Figures 10, 13, 19, 29 drawn to a third embodiment of a paddle diverter assembly diverting articles onto a parallel conveyor and a third embodiment of an arm of the paddle diverter assembly, a third embodiment of a merge system and a third embodiment of a justifier assembly.

Species IV, Figures 14-16 and 20-25 drawn to a fourth embodiment of a paddle diverter assembly and a fourth embodiment of a merge system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 21 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Van Dyke, Gardner, Linn & Burkhart on 4/27/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rashmi K. Sharma whose telephone number is 571-272-6918. The examiner can normally be reached on Monday-Thursday.
